Education

Lovely Professional University

Master of Computer Applications

Oct 2024 – Jul 2026

Noida

Ambalika Institute of Management Technology

Bachelor Of Computer Application

Sep 2021 – Jun 2024

Lucknow

Experience-

Abhiwan Technology

Apr 2025 – Present

Software Engineer Intern

- Utilized Java Collections, Streams, and multithreading to optimize backend logic and improve performance. Control, MongoDB for efficient data storage, and implementing OAuth authentication for enhanced security.
- Working on an integration, creating a common schema for mapping all CRUD pipelines, API's, testing, bug checking, resolving issues.
- Collaborated with team members using GitLab for version control, ensuring organized task management and smooth project execution make reports.

Code Alpha

Nov 2023 – Jan 2024

Web developer Intern

- working on a project that involves Html, CSS, JavaScript and Web development, GitLab for version. control, MongoDB for efficient data storage, and implementing OAuth authentication for enhanced security.
- Working on an integration, creating a common schema for mapping all CRUD pipelines, testing, bug checking, and resolving issues.
- Collaborated with team members using GitLab for version control, ensuring organized task management and smooth project execution.

Project

E-commerce website | Java, Spring, Bootstrap, JavaScript, PostgreSQL | [Nitesh1357/Ecommerce-web: Try to make website using Spring Boot](#)

- Fully functional **E-commerce website** with **Java** and **Spring Framework**.
- Responsive front-end using **HTML**, **CSS**, and **JavaScript**.
- Built robust RESTful APIs for handling products, orders, and cart functionality, Functional Programming.
- Optimized database performance with **MySQL** for scalable data management.

Turismo- travel agency website | React, MySQL, JavaScript, Java, Spring | [Turismo](#)

- Turismo**, a dynamic travel agency website using **Java** and **Spring Framework**.
- Implemented features for booking, itinerary management, and user reviews.
- Ensured application security and performance through comprehensive testing and debugging.
- Integrated responsive design to support cross-platform usability.

Technical Skills

Languages: Java, Python, OOPs, JavaScript, HTML/CSS, MySQL, Google Cloud Platform.

Developer Tools: VS Code, IntelliJ, AWS, Netlify, Vercel, Postman, API integration.

Technologies/Frameworks: Rest APIs, Spring Boot, DSA, Git and GitHub, React, Bootstrap, Linux.

Skills- Problem-solving, Critical thinking, Self-learning, Adaptability, Time Management, Functional Programming.

Achievements

- Solved 300+ DSA problems on LeetCode and GFG, earning multiple badges and enhancing algorithmic proficiency.
- Secured 15 open-source projects during Hacktoberfest by fixing vulnerabilities and improving code reliability.
- Secured multiple swags from Google Cloud Arcade, Bootcamps, and DevFest through active participation.
